

Tron City Tattoo and Piercing

8665 SW Canyon RD
Beaverton, OR 97225

- 1) Leave bandage on for 1-2 hours.
- 2) Rinse tattoo with hot water, removing any blood, plasma, or excess ointment.
- 3) Rinse tattoo for a full two minutes with cold water.
- 4) Apply a small amount of Tron City Tattoo Salve or Aquaphor to tattoo, rubbing in like lotion twice daily until tattoo is completely healed.

Always wash your hands before touching your tattoo. Do not pick at or scratch your tattoo. You will want to keep your tattoo as dry as possible, showering is perfectly fine, however, do not let your tattoo soak in anything, as any excess moisture will create a thicker scab which will prolong your heal and likely harm your tattoo. Tanning beds and sunshine will fade your tattoo, especially while it is healing.

We take a great amount of care in making sure your tattoo looks as good as possible and want to ensure it looks great after it's healed. For that reason we offer one free touch up within the first six months. So if your tattoo needs a little extra love, let us know and we will schedule a time to take care of that free of charge.

Please feel free to call us at 503-292-4500 if you have any questions or issues and if for any reason our recommendations don't work for you, please consult with your artist before trying anything else.
